

Treo™ smartphones for Education

Stay connected on campus. Access essential information when you need it. The Palm® Treo™ smartphone works in education.

The Palm®Treo™ smartphone simplifies even the busiest workdays by combining phone, email, organizer, messaging and web access¹ in a single, no-compromise device. Outside the lecture hall or classroom, in hallways, on or off campus, administrators, faculty and staff can enjoy wireless access to important school and personal data in order to track routine school business or respond to unexpected events.

Taking smartphone email a step further

Palm Treo smartphones offer an array of secure, wireless email solutions with support for Microsoft Exchange/Outlook®, Lotus Domino/Notes®, and Novell Groupwise®, as well as POP and IMAP. Download mail wirelessly or by synchronizing with your desktop. Use the built-in VersaMail® application to view photos, HTML, and even native Microsoft® Word, Excel, and PowerPoint attachments. For district-wide or campus-wide email, a centrally managed server behind the firewall can handle data traffic to the Treo smartphone without involving a desktop computer.

Information when and where you need it

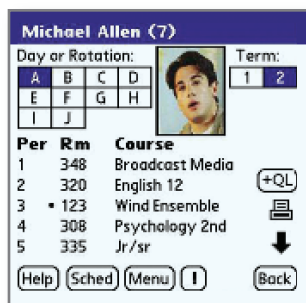

Get data from a student information system, share a PowerPoint presentation at a school board meeting, locate a student by image and class schedule, email colleagues, and stay in close contact with important individuals throughout your school system. You also have a choice of operating systems. Palm offers smartphones with the ease of use of the Palm OS® or the power of Windows Mobile®. Powerful and simple, a Palm smartphone can make every moment more productive.

“We’re road warriors. We maintain hectic schedules, travel a lot, and work on many weekends. We find ourselves reading email at all hours, trying to stay in touch no matter where in the world we go.”

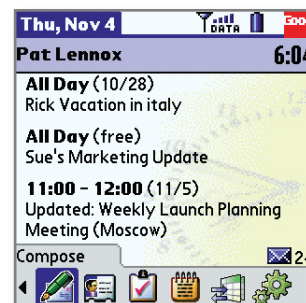

Dr. Karla Stein, Senior Vice President of International Relations, Lynn University, Boca Raton, Florida

¹ Within wireless service coverage area only. Web, email, and messaging may require data services from a mobile service provider at an additional cost. ISP may also be required.

² Third party product required. Sold separately. ³ Expansion cards sold separately.

ScheduleFinder®
